DETAILED ACTION

1. Claims 15, and 28-39 are pending in the application.
2. Applicants' amendments, filed 6/30/04, have overcome the 35 USC 112, first paragraph rejection issued in the office action dated 3/26/04.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by Kotowski et al. {PL 157499; abstract only}.

Kotowski et al. disclose the presently claimed catalyst which is composed of an alkali metal type catalyst and a catalyst containing copper simultaneously manganese (see abstract).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicants have claimed a catalyst by reciting a general process from which the catalyst may be obtained, however, applicants have not listed

Art Unit: 1621

any components of which the catalyst may be comprised. Thus, it is unclear as to what is the particular/specific make-up of the presently claimed catalyst.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: Claims 15, 29-38 are unobvious over the prior art of record because the prior art of record does not teach or suggest producing methanol by a synthesis gas reaction of an alcohol in the presence of an alkali or alkaline earth metal-type catalyst and a catalyst containing Copper simultaneously with Manganese or Rhenium. The prior art of record does not teach or suggest producing methanol according to claims 29 and 30.

Response to Arguments

Applicants' arguments, filed 6/30/04, have been considered but are not found persuasive.

Applicants argue that the Kotowski et al. reference discloses a catalyst used for the preparation of a mixture of aliphatic C1 to C4 alcohols with methanol and isobutanol from a mixture of carbon monoxide, hydrogen and carbon dioxide where as the catalyst of the presently claimed invention is for producing a methanol from an alcohol.

This argument is not convincing because the use of the catalyst is not given any patentable weight.

Applicants argue that the catalyst of the Kotowski et al. reference contains Zirconium (Zr) as an essential element and the presently claimed catalyst does not include Zr.

This argument is not convincing because applicants' claim language does not exclude the possibility of additional components that may be contained in the catalyst containing copper simultaneously with manganese and/or rhenium.

Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
